DETAILED ACTION

Allowable Subject Matter

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1 and 21 is the inclusion of limitations for determining whether the signal satisfies a predetermined threshold after it is generated by the oscillation of the transducer, mixed with a reference signal, filtered to generate a correlator output and detected. Tamayo de Miguel et al. (US Patent Application Publication 2003/0137216) teaches generating an output signal from the oscillation and deciding whether the output signal represents an interaction between a free ligand in a fluid and a receptor attached to the transducer (par. 7). Stopler et al. (US Patent No. 2003/0043925) teach mixing an output signal with a reference and filtering the mixed output signal. However, neither Stopler nor Tamayo de Miguel et al. teach the threshold comparison step. Similar limitations are also found in independent claims 9 and 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
